

YOUR QUESTIONS ANSWERED

What makes Celora™ Vita different?

Unlike treatments that simply add volume, Celora™ Vita focuses on improving the skin itself, enhancing hydration, smoothness and resilience from within.

How many treatments I will need?

The treatment is delivered as three sessions, spaced several weeks apart, to support gradual and natural improvements in skin quality.

Is this treatment for me?

Celora™ Vita is designed for individuals seeking a preventative or regenerative approach to skin ageing, with progressive, natural-looking improvements in skin quality.

What results can I expect?

Celora™ Vita helps improve hydration, refine skin texture and strengthen firmness and elasticity, while softening the appearance of fine lines and wrinkles for healthier-looking skin.

Is there any downtime?

You may experience mild redness or slight swelling after treatment, which usually settles quickly. Most people return to normal activities the same day.

Is it a safe treatment?

This treatment should only be administered by a qualified healthcare professional following a personalised consultation. For your safety, choose a clinic with medically trained practitioners experienced in injectable treatments.

WHY CHOOSE CELORA™ VITA

High Patient Satisfaction

Natural Looking Results

Established Safety Profile

Individual results may vary.
Always consult with a healthcare practitioner.

TRUE
BIORESTORATION

WHAT IS CELORA™ VITA?

Celora™ Vita is an injectable treatment designed to support the skin from within. Combining targeted amino acids with hyaluronic acid, it delivers the essential building blocks needed to restore balance, strengthen skin structure and enhance hydration for healthier, more resilient skin.

Ageing, stress and environmental factors gradually slow the skin's natural renewal processes, reducing collagen, elasticity and radiance. As amino acids, which are key components of collagen and elastin, decline, the skin loses its ability to repair and renew itself.

Celora™ Vita replenishes these elements directly within the skin, supporting biorestitution and improving overall skin quality over time.

YOUR TREATMENT BENEFITS

Enhances **hydration**

Restores **natural brightness**

Refines **skin texture**

Boosts **firmness and elasticity**

Softens **wrinkles and fine lines**
