TECHNICAL SKILLS

MOBILE DEVELOPMENT

Flutter · Dart · Android (Kotlin/Java) · iOS (Swift)

ARCHITECTURE & PATTERNS

Clean Architecture · MVVM · MVI · SOLID · OOP

STATE MANAGEMENT

BLoC / Cubit · GetX · Provider

BACKEND & APIS

RESTful APIs · Firebase · Socket.IO · SignalR · Python

DEVOPS & TESTING

CI/CD (Azure) · GitLab Pipelines · TDD / BDD · Mockito · Fastlane

TOOLS & PLATFORMS

Git Flow · JIRA · Trello · ClickUp · Crashlytics

SPECIALIZATIONS

FinTech · NFC · Payment Systems · In-App Purchases · Deep Linking · TensorFlow

LANGUAGES

Urdu — Native

English — Proficient

AWARDS

Gold Medalist

PMAS Arid Agriculture University

FAIZAN ULLAH

Senior Mobile Developer — Flutter | Android | iOS

PROFESSIONAL SUMMARY

Detail-oriented and results-driven Senior Mobile Developer with over 5 years of experience designing and delivering cross-platform mobile applications using Flutter, Kotlin, and Swift. Specialized in building secure, scalable, and high-performance solutions for FinTech, e-commerce, and AI-powered platforms. Proven track record of achieving a 25% improvement in app responsiveness, a 30% reduction in code-related issues, and a 20% decrease in crash rates. Experienced in leading development for high-stakes applications such as American Express KSA, with deep expertise in CI/CD pipelines, TDD, clean architecture, and agile methodologies. Consistently delivers 95% on-time across diverse, cross-functional teams.

EXPERIENCE

Senior Software Engineer (Flutter) — Nov 2024 – Present
Veroke — American Express KSA (Remote)

▸ Architect and develop secure, scalable FinTech mobile applications using Flutter, serving thousands of users across Saudi Arabia.

▸ Implement VPN integrations, biometric authentication, and performance optimizations, achieving a 25% improvement in responsiveness.

▸ Drive code quality through TDD and BDD using Mockito, reducing code-related issues by 30%.

▸ Apply MVVM, MVI, and Clean Architecture with BLoC/Cubit, GetX, and Provider, decreasing crash rates by 20%.

▸ Manage CI/CD pipelines via Azure DevOps, enforce SOLID principles, and integrate DexGuard/iXGuard for app security.

Software Engineer (Flutter) — Dec 2022 – Jun 2024
Dtek.ai — Dubai, UAE

▸ Engineered multi-platform mobile applications processing media with multilingual support, increasing user engagement by 15%.

▸ Integrated Firebase Analytics and Crashlytics for data-driven insights, improving user satisfaction by 10%.

▸ Implemented real-time communication using Socket.IO and SignalR for inventory, orders, and transaction synchronization.

▸ Configured payment terminal SDKs, receipt printer SDKs, and KIOSK/SWIFT device integrations for POS operations.

▸ Managed CI/CD pipelines and established RESTful API integrations, Bar/QR code, and push notification systems.

Software Engineer (Flutter) — Nov 2021 – Dec 2022
TechNestPk — Islamabad, Pakistan

▸ Developed feature-rich mobile applications integrating Google Maps, multi-language support, and push notifications.

▸ Implemented monetization via AdMob, Facebook Ads, and AppLovin Ads, contributing to revenue growth.

Junior Software Engineer — Apr 2021 – Oct 2021
Vconekt — Islamabad, Pakistan

▸ Contributed to cross-platform mobile application development using Flutter, collaborating on feature implementation and bug resolution.

Junior Flutter Developer — Jan 2020 – Apr 2021
BIIT, Rose Software House — Rawalpindi, Pakistan

▸ Developed secure real-time chat features leveraging Node.js, PHP, and Socket.IO for audio, video, and text communication.

▸ Resolved security vulnerabilities in multimedia functionalities, ensuring data integrity and user privacy compliance.

KEY PROJECTS

American Express KSA (AMEX KSA) — *Flutter · Azure · VPN · FinTech*

Developed a secure, high-performance FinTech application for American Express users in Saudi Arabia, ensuring seamless financial transactions, account management, and VPN security while complying with local and international banking regulations.

WeTrends — Social App with Live Streaming & E-Commerce — *Flutter · Socket.IO · Firebase*

Designed and developed a short-video social platform similar to TikTok, integrating live calling, real-time streaming, in-app chat, and e-commerce features enabling users to buy and sell products directly within the platform.

Dtek Swift — Auto Cashier System with AI — *Flutter · AI · Face Recognition*

Designed and developed the frontend UI for an AI-powered automated cashier system, streamlining the checkout process using facial recognition and payment automation.

EDUCATION

Bachelor of Science in Information Technology
PMAS Arid Agriculture University — Rawalpindi, Pakistan

Graduated August 2021 | Gold Medalist
